PROFESSIONAL AMPLIFIER

APPLICATIONS

+ Conferencing

+ Multi-zone Paging

+ Emergency Communications

+ Business Entertainment

+ Sound Reinforcement

ADVANTAGES

+ The onboard EIM port allows connection directly to ClearOne devices with an EIM connection. By using a CAT5 connection, the AMP2200 makes it easy to add an external amplifier to any VIEW system.

+ The AMP220 is designed to be freestanding or rack mounted. It occupies 1RU of space on a standard 19" rack.

+ Uses a forced air tunnel fan system to cool the amplifier at very low ambient noise levels.

+ Includes LED lights that indicates power state and activity, including clipping. It will also indicate when a fault condition exists like overheating, a hard clip, or a short in the wires.

+ Ships with rack ears for easy rack mounting.
